PERSONAL PROFILE

Diligent and versatile individual seeking work as a Web Developer. Experienced with using React and Node to build websites, applications and user interfaces with responsive designs.

EXPERIENCE

Packaging Technician

Neal's Yard Remedies, October 2016 – present

- Work on new product development, including a gold launch, with sustainability as a key focus
- Troubleshoot quality and performance issues
- Carry out all component testing and developed a new tracking system, which involved learning to code in VBA, to meet the business' requirements
- Visit suppliers to assess their capabilities
- Attend press passes to ensure accurate colour reproduction
- Organise and attend line trials where necessary
- Led the packaging waste legal compliance project from a componentry perspective
- Provided technical support in subcontract gift packer tender process
- Participate in change control process
- Write technical component and packing specifications
- Involvement in induction process for new starters
- Conduct monthly health & safety inspections of the office and lab areas
- Provide artwork approval from technical perspective
- Daily use of SAGE ERP system and Office 365

Bartender

The Walnut Tree Inn, June 2015 – September 2015

- Summer holiday work, which provided experience working directly with customers, listening to and providing for their needs under time pressure and in a personable manner
- Helped to develop a warm and welcoming environment in the restaurant to encourage new customers
- Facilitated the needs of the business in a flexible role, spanning from the restaurant to the kitchen as required

Line Operator

Wyke Farms, June 2014 – August 2014

- Summer holiday work involving operating an assembly line and meeting tight deadlines
- Working in a factory environment allowed for a stronger understanding of the need for efficiency, and to carry out trials, which have been key considerations during product development
- Followed an organised and effective process to help keep a fast-moving department running productively

QUALIFICATIONS

Higher Education

University of Southampton, September 2013 – September 2016

Chemistry (BSc), Second Class Honours

A-Levels

Gillingham Sixth Form, September 2011 – July 2013

Chemistry, A

Biology, A

Maths, B

INTERESTS

- Learning to code, which has greatly improved problem-solving skills and has been directly applicable in previous roles
- Cooking healthy meals and experimenting with new recipes
- Staying active and healthy by running and rowing, while setting personal fitness goals
